Compatibility with Enhanced E911 Emergency	)	
Calling Systems	)	

To: The Commission

FINAL STATUS REPORT  
FARMERS MUTUAL TELEPHONE COMPANY

Farmers Mutual Telephone Company, by its attorney, (Reporter), pursuant to the Commission's February 22, 2006, *Order*, FCC 06-16, ¶ 18, hereby submits its final status report regarding the 95% location capable handset penetration requirement. In support whereof, the following is respectfully submitted:

(1) The number and status of Phase II requests from PSAPs (including those requests Farmers may consider invalid): Payette County Idaho is the only PSAP requesting Phase II 911 capabilities.

(2) The dates on which Phase II service has been implemented or will be available to PSAPs served by Farmers' network: Payette County was in service for Phase II service in December 2005.

(3) The status of Farmers' coordination efforts with PSAPs for alternative 95% handset penetration dates: Farmers is the database provider for Payette County PSAP. Farmers is in regular contact with Payette County on all 911 issues and Payette County is aware of Farmers' phone replacement plans. There is no formal reporting nor any request

for a formal plan from the PSAP at this time.

(4) Farmers' efforts to encourage customers to upgrade to location capable handsets: Farmers has engaged in various promotions to encourage subscribers to switch to location capable handsets including an offer to discount the phones with a free car charger was mailed to all customers with contract plans still holding non-compliant handsets. Farmers engaged in direct calling to urge subscribers to convert to location capable handsets.

(5) The percentage of Farmers' customers with location-capable phones: As reported in the February 23, 2007 supplement to the January 31, 2007 *Status Report*, Farmers' penetration rate is now 95+% and Farmers is in compliance with the 95% penetration standard.

(6) Detailed discussion about the efforts made to achieve compliance and whether Farmers is on schedule to meet the extended 95% penetration deadline: As previously reported, in its effort to achieve compliance, Reporter made follow-up calls to all subscribers who did not switch to a location-capable handset. Farmers mailed to subscribers promotional material which offered a free Kyocera Rave with a 2 year contract extension. Farmers made significant progress toward migrating reluctant subscribers to GPS capable handsets and Farmers remains in compliance..

Respectfully submitted,  
FARMERS MUTUAL TELEPHONE COMPANY
